$f_i$  reprezintă factorul de impact al revistei științifice în care a fost publicat articolul  $i$ ;

$n_i$  reprezintă numărul de autori ai articolului  $i$ ;

$C$  este numărul de citări, provenind din articole publicate în reviste științifice care au un factor de impact mai mare sau egal cu 0,5, care citează articole științifice publicate de candidat, ca autor sau coautor. Nu se iau în considerare citările provenind din articole care au ca autor sau coautor candidatul.
