at internship@stratec.ro

The graphic features a central illustration of four people in business attire working together around a table with various tools and a laptop. The background is decorated with light blue and red circuit-like patterns. A large red horizontal bar is positioned at the bottom of the graphic area.

Build a robot with us!

Together with the team and an experienced mentor, you will **DESIGN** solutions and **WORK** hard to develop a laboratory robotic system.

For us **RESULTS MATTER**, so in 10 intense weeks you will **LEARN** a lot and get **PAID** for that. At the end, if you share our values we will give you the chance to join our team.

Apply **NOW** for a 10 weeks PAID internship at <http://internship.stratec.ro/>

About Stratec

“STRATEC” – our engineering is often inside, but seldom on the label

We develop and produce fully automated analyzer systems used by many of the leading global in vitro diagnostics companies, as well as Hematology and Clinical Chemistry systems, marketed under the Diatron brand. We also offer integrated software solutions for laboratories and sample preparation products to both clinical and research laboratories working with molecular diagnostics.

If you work for us you can expect a dynamic team, an open working environment and flat hierarchies. We offer a long-term perspective, as well as challenging and varied day to day tasks.
