

Lista lucrărilor științifice

1. **Ticala, C.**, Pinte, C.-M., Ludwig, S.A., Hajdu-Macelar, M., Matei, O., Pop, P. C.: *Fuzzy Index Evaluating Image Edge Detection obtained with Ant Colony Optimization*. In: FUZZ-IEEE 2022, accepted paper. IEEE, Padua Italy (2022)
2. **Țicală, C.**, Pinte, C.M., Matei, Oliviu: *Sensitive Ant Algorithm for Edge Detection in Medical Images*, Appl. Sci. **2021**, 11(23), 11303 (revista ISI, IF = 2.679 (2020))
3. Berinde, V., **Țicală, C.**, *Enhancing ant-based algorithms for medical image edge detection by admissible perturbations of demicontractive mappings*, Symmetry **2021**, 13(5), 885 (revista ISI, IF = 2.713 (2020))
4. **Țicală, C.**, Zelina, I., Pinte C.M., *Admissible Perturbation of Demicontractive Operators within Ant Algorithms for Medical Images Edge Detection*, Mathematics **2020**, 8, 1040. (revista ISI, IF= 2.165 (2020))
5. Zelina, Ioana, Hajdu-Măcelaru, Mara, Țicală, Cristina, *About the cube polynomial of Extended Fibonacci Cubes*, CREAT. MATH. INFORM., 27 (2018), No. 1, 95 – 100, (indexat AMS, MR, zbMATH)
6. **Țicală, C.**, *Approximating fixed points of asymptotically demicontractive mappings by iterative schemes defined as admissible perturbations*, Carpathian J. Math., **33** (2017), No. 3, 381–388. (revista ISI, IF= 1.778 (2020))
7. **Țicală, C.**, Zelina, I., *New ant colony optimization algorithm in medical images edge detection*, Creat. Math. Inform., **29** (2020), No. 1, 329–336. (indexat AMS, MR, zbMATH)

8. **Țicală, C.**, *Approximating fixed points of demicontractive mappings by iterative methods defined as admissible perturbations*, *Creat. Math. Inform.*, **25** (2016), No. 1, 121–126. (indexat AMS, MR, zbMATH)
9. Pinteă, C.M., **Țicală, C.**, *Medical Image Processing: A Brief Survey and a New Theoretical Hybrid ACO Model*, *Combinations of Intelligent Methods and Applications. Smart Innovation, Systems and Technologies*, Springer, Cham, vol. 46 (2016), 117–134. (indexat WoS ISI-Proceedings)
10. **Țicală, C.**, *A weak convergence theorem for a Krasnoselskij type fixed point iterative method in Hilbert spaces using an admissible perturbation*, *Sci. Stud. Res. Ser. Math. Inform.* **25** (2015), no. 1, 243–251. (indexat AMS, MR, zbMATH)
11. **Țicală, C.**, *Approximating solutions of generalized pseudocontractive variational inequalities by admissible perturbation type iterative methods*, *Creat. Math. Inform.* **22** (2013) No. 2, 237–241. (indexat AMS, MR, zbMATH)
12. **Țicală, C.**; Balog, L. *Empirical study of the rate of convergence of some Newton type methods*. *Creat. Math. Inform.* 17 (2008), no. 3, 521–524 (2009). [85]
13. Andrei Horvat-Marc, C **Țicală**: *Localization of solutions for a problem arising in the theory of adiabatic tubular chemical reactors*, *Carpathian J. Math.* 20(2004), No. 2 187-192.
14. V. Berinde, M. S. Pop, V. Serdean, I. Balazs, **C. Țicală**, *Journals of Mathematics Education and Elementary Mathematics in Romania*, 64 pagini, **Editura CUB PRESS 22**, Baia Mare, 2004.
