

TUCN will have a Support Centre dedicated to facilitating the access of public and private entities to the RDI competitions

The Technical University of Cluj-Napoca (TUCN) signed the financing contract for the project "CeS-UTCN – Scientific Excellence and Smart Specialisation dedicated to facilitating the access of public and private entities to the RDI projects/competitions", with a total value of 2.271.223,87 RON.

The project is financed within the Competitiveness Operational Program, Priority Axis 1: Research, development and innovation (RDI) supporting economic competitiveness and the development of businesses, component 1: SUPPORT CENTRES: Creating synergies with the CDI actions of EU Horizon 2020 and other international CDI programmes.

The establishment of CeS-UTCN Support Centre will contribute to strengthen TUCN's administrative capacity, to develop excellence, to consolidate research and innovation, ensuring professional support for the TUCN research entities to participate in international competitions, especially within Horizon 2020 program, and to submit applications/projects within the competitions organised at European level and worldwide, in areas of interest such as smart specialisations, advanced Materials and eco-nanotechnologies.

The implementation period of the project is 39 months, and the Support Centre will be installed and equipped within TUCN, str. Emil Isac nr. 18.
