

Associate Software Engineer

WHO WE ARE:

GEP delivers transformative supply chain solutions that help global enterprises become more agile and resilient, operate more efficiently and effectively, gain competitive advantage, boost profitability and increase shareholder value.

A leader in multiple Gartner Magic Quadrants, GEP's cloud-native software and digital business platforms consistently win awards and recognition from industry analysts, research firms and media outlets, including Gartner, Forrester, IDC and Spend Matters. GEP is also regularly ranked a top supply chain consulting and strategy firm, and a leading managed services provider by ALM, Everest Group, NelsonHall, IDC, ISG and HfS, among others. Headquartered in Clark, New Jersey, GEP has 21 offices and operations centers across Europe, Asia, Africa and the Americas.

Hit the Ground Running with GEP, a Leading Global Technology Firm.

Responsibilities:

- The opportunity to research, evaluate and recommend new and innovative technologies and solutions in the Procurement, Supply Chain industry.
- Design and develop prototypes and ensure timely evolution of prototypes into products.
- Developing software systems that are reliable, maintainable, and efficient, with emphasis on clean code, optimal development practices and robust APIs.
- Develop practical solutions to complex open-ended problems.
- Build & evaluate algorithms and work with the rest of the team to integrate these algorithms into larger solutions.
- Managing the deployment of GEP systems via CI/CD pipelines into all environments and completing all required documentation
- Assisting the support team with troubleshooting and resolution of issues reported on production systems.
- Approach low-code / AI innovations to maintain technical leadership.

Skills & Requirements:

- Bachelor's degree in Computer Science or relevant experience -it's important to know the fundamental theories that guide a proficient developer, but we definitely appreciate even more your hands-on experience
- Strong written and verbal communication, problem solver skills, and be able to work well in a team environment.
- Programming fundamentals - knowledge of basic principles and concepts of programming and development, as well as conventional web development methodologies, frameworks and protocols
- Strong understanding of OOP principles.
- Understanding / hands on experience with technologies like .Net Core, Entity Framework, .Net Generics, WebApi, asynchronous programming
- Core knowledge with Angular, JavaScript/Typescript or any of the JS frameworks
- Working knowledge of Relational Databases and SQL, Non-Relational DBs is also a big plus.
- Experience with Git or any other version control system
