

Title: Remote tech support and database development position

BENEFITS:

- work from home
- salary based on qualifications, potentially above average
- opportunity to grow with the company
- very friendly and supportive work environment
- opportunity to learn from the head developer
- supporting multi-national clientele aboard yachts.

LOOKING FOR:

Looking for a bright detail-oriented individual with keen interest in technology to provide tech support for our yacht management software and eventually graduate into the second developer role. You need to know the basics of computer troubleshooting, know some programming language and ideally have a Computer Science degree. However, we will consider other degrees as well. This is a remote job – you will be working from home yet closely with other members of our team. We will provide all necessary training and you will have opportunities to grow with the company.

OUR COMPANY:

We are a US company with active presence in Europe providing simple software for keeping track of expenditures on luxury yachts.

www.latitude365.com

DUTIES WILL INCLUDE:

- Tech support
- Database software development

REQUIREMENTS:

English (very good spoken and written)
University Degree (or last year of University students)
Outstanding grades for both university and high school
Knowledge of Windows troubleshooting
Knowledge of some programming language

WOULD BE A PLUS BUT NOT REQUIRED:

Experience with relational database development
SQL
Networks/servers maintenance and troubleshooting
Prior experience working with software development

HOW TO APPLY:

Please only apply via the below link. We will not review applications made in any other way.
