

BuildingLAB

The department of architecture at Darmstadt University of Applied Sciences is currently establishing the **BAULAB** [BuildingLAB] with Prof. Anke Mensing as its initiator. The LAB is conceived as a living laboratory on the topic of building with regard to sustainable, aesthetic and inclusive living environments. The BAULAB is **currently applying for funding through the program "shaping a greener and fairer way of life in creative and inclusive societies through Architecture, Design and Arts"** of the **New European Bauhaus** (c.f. The New European Bauhaus – shaping a greener and fairer way of life in creative and inclusive societies through Architecture, Design and Arts ec.europa.eu/info/funding...)

The funding program requires a collaboration of international partners, who support or pursue the ideas, resulting in similar or complementary formats with international exchange.

We see this as an interesting opportunity to intensify the contact and the exchange between the EUT+ universities and hope that the project is also of interest for you. We hope to win you as a partner to establish formats that are interesting for all of our students. We would be happy to share more information.

Best regards

the BAULAB Team

Anke Mensing, Katharina Körber, Céline Grieb
